Introducing the NEC Cordless DECT Telephone

NEC Unified Solutions, Inc. is pleased to announce the availability of our exciting new Cordless DECT telephone and repeater, which is our latest mobility solution for the DSX system.

This cordless product uses 1.9G DECT technology, and connects to the DSX system through a standard digital station port. It has 8 programmable feature keys, which can be used for Line Keys, Hotline, Park, etc. The Cordless DECT can be associated with a DSX key telephone or used as a stand-alone station. The handset provides up to (16) hours of talk time, with up to (7) days in stand-by mode.

The Cordless DECT Telephone consists of the following components:

- Base unit with base stand, wall plate adapter, AC adapter and line cord.
- Charging unit with AC adapter.
- Handset with rechargeable battery and belt clip.

The Cordless DECT Repeater is equipped with an AC adapter and mounting hardware.

The Cordless DECT product is an excellent enhancement for all of your residential and business applications.
